

What is claimed is:

1. A gaming machine in which a base game and a bonus game are conducted, the bonus game being conducted when a predetermined result is obtained in the base game,

the gaming machine comprising:

a preparation device for preparing a plurality of limbs belonging to a first limb group in the bonus game, each of the limbs corresponding to individual effect contents;

a display device for displaying a part of the limbs in the first limb group;

a first operation device for operating the display device so that a remainder except for the part of the limbs in the first limb group is displayed on the display device;

a first selection device for selecting at least one of limbs in the first limb group displayed on the display device, the limbs including the part and the remainder thereof; and

a game control device for processing the bonus game according to the effect contents corresponding to the limb selected by the first selection device.

2. The gaming machine according to claim 1, further comprising:

a touch panel arranged on the display device;

wherein the first operation device and the first selection device are constructed on the touch panel.

3. The gaming machine according to claim 2, wherein the first operation device is constructed from a first scroll bar displayed on the display device and a touch panel portion corresponding to the first scroll bar.

4. The gaming machine according to claim 3, wherein the remainder of the limbs in the first limb group is displayed by operating the first scroll bar.

5. The gaming machine according to claim 4, wherein the preparation device prepares a plurality of limbs belonging to a second limb group when at least one of limbs in the first limb group is selected by the first selection device, and

wherein a part of the limbs in the second limb group are displayed on the display device.

6. The gaming machine according to claim 5, wherein the second limb group corresponds to each of the limbs in the first limb group.

7. The gaming machine according to claim 6, further comprising:

a lottery device for allotting a payout to each of the limbs in the second limb group.

8. The gaming machine according to claim 7, further comprising:

a second operation device for operating the display device so that a remainder except for the part of the limbs in the second limb group is displayed on the display device; and

a second selection device for selecting at least one of limbs in the second limb group displayed on the display device

9. The gaming machine according to claim 8, wherein the second operation device and the second selection device are constructed on the touch panel.

10. The gaming machine according to claim 9, wherein the second operation device is constructed from a second scroll bar displayed on the display device and a touch panel portion corresponding to the second scroll bar.

11. The gaming machine according to claim 10, wherein the remainder of the limbs in the second limb group is displayed by operating the second scroll bar.

12. The gaming machine according to claim 8, wherein the display device comprises a first monitor on which the base game is conducted and a second monitor arranged adjacent to the first monitor.

13. The gaming machine according to claim 12, wherein the limbs including the part and the remainder in the second limb group are displayed on the first monitor and the limb in the second limb group selected by the second selection device on the first monitor is displayed on the second monitor.

14. The gaming machine according to claim 12, wherein the limbs including the part and the remainder in the second limb group are displayed on both the first monitor and the second monitor.
